# Unlimited Remote Support & Antivirus Protection Plans

NEW PROTECTION PLAN

The most common computer issues are related to viruses, malware, adware, software configurations and speed problems. Here at JK Techs we have the tools and resources that allow our technicians to offer quick solutions for these common problems.

Our new Antivirus Protection Plan now includes EMSISOFT Antivirus, one of the most powerful tools used by computer technicians across the USA to clean computers. PLUS, Unlimited Remote Support, then If your computer is having an issue or you need a basic software configuration, you just make a call and we will connect remotely to give you a PC cleaning at NO EXTRA CHARGE.

You Membership also will give you 25% OFF on any other service you will need in the future.

JK TECHS

It seems that a device that is plugged into your computer is not set up properly. If you need help setting it up, please let us know.

HOW THAT WORKS?

This new JK Techs App that we install will allow our techs to sweep through an infected PC's critical files and notify us when the system finds any problems and allows us to fix them for you remotely. Many people pay more than $100 a year for Norton, McAfee or other Antivirus only to somehow still end up with computers riddled with viruses and system issues. The Antivirus Plan offered by JK Techs will allow our customers to be Fully Protected for the Entire Year.

Our Antivirus Protection Plan takes the confusion and hassle out of choosing what antivirus program is best for you. Our Antivirus Software tool allows our technicians the ability to sort out most PC problems remotely without ever needing to leave the comfort of your home or office!
